

# Solatube Brighten Up™ Series Buying Guide

## Information You'll Need To Know

- What area is to be lighted? (this will determine which unit will be needed)  
     10'-150 sq ft                      14'-250 sq ft
- What is the roof type (shingle, tile, flat)?  
 (this will determine which flashing to include)
- Is there attic access (lighted and vented units)?  
 (You cannot install lighted or vented units without attic access.)
- What is the attic space (distance from roof hole to ceiling hole)?  
 (You will need to know this to determine how many extension tubes are needed.  
 Please refer to reference guide below.)

### Extension Reference Guide

#### Combination of 16" and 24" extensions

Attic Height <sup>1</sup>	Additional Ext. Tubes Needed
up to 43"	none <sup>2</sup>
57"	(1) 16"
65"	(1) 24"
79"	(1) 16" and (1) 24"
87"	(2) 24"
101"	(2) 24" and (1) 16"
109"	(3) 24"
123"	(3) 24" and (1) 16"
131"	(4) 24"
145"	(4) 24" and 16"

<sup>1</sup> Distance is measured from ceiling hole to roof hole at the center of a 10" opening  
 (Subtract 2" if installing add-on ventilated kits)

<sup>2</sup> Standard single pack kits include enough tubing to complete an install up to 43"
